Frontend Intern Task

Create a frontend application on ReactJS/NextJS which supports the following functionality

Replicate our Trademarkia Search Page with the help of the link given below:

- The page should have a Search bar for user input and Filters for owner, law firm, attorney and status of the trademark
- Use the Figma link given below and develop a page that adheres to our UI/UX standards and integrate these APIs given below based on user queries.

Resources Provided:

Trademarkia Search Page:
https://www.trademarkia.com/search/trademarks?query=nike&country=us

Figma File of Design:
https://www.figma.com/design/UAt5wN8hy8JuFhMTsXK2Re/Search-results-for-front-end-task?node-id=0-1&t=9swhmBlc1HhivDtS-0

API Documentation:

https://www.postman.com/trademarkia/workspace/new-hiring-2024/request/34681474-16bfa9da-0720-4eea-90ee-7e7b1354af1b?action=share&creator=34681474&ctx=documentation

Instructions:
Include a status indicator on the page that informs users of the search progress (e.g., "Searching," "No Results Found," "Error Occurred")

CSS Frameworks: Use TailwindCSS or any CSS framework of your choice.

Bonus:

1. Usage of TypeScript
2. SSR implemented using NextJS (cache if possible)
3. Persistent shareable search results link
4. Loading states wherever possible.

Timeline to Submit the task on 15th Sep 2024(Sunday) 8:00 PM IST
